The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,841,182. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is not seen that the product flowing from the process of the prior patent alone constitutes unobviousness.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation

given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation of the polyphenols, and the claim also recites the preferable range which is the narrower statement of the range/limitation.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Decio (0,421,504) in view of Chen (5,374,751) and further in view of Lai Ganguli (0849353).

Decio discloses a margarine that is made from olive oil and butter. The spread is made from unrefined olive oil and has a characteristic olive flavour. The claims appear to differ from the reference in the recitation that the oil has a particular polyphenol content and that the oil has no perceivable olive oil odor. Chen teaches deodorizing edible oil. In the abstract, the process is indicated to remove substances that impart a disagreeable odor and taste to the oil. At example 1 the preparation of olive oil is disclosed. Lai Ganguli teaches that olive oil is known to contain polyphenols (page 2, lines 16-27). In Ganguli the polyphenols do not appear to be volatile because they are prepared by extraction into water and the concentration by evaporation of the water phase (see abstract). It would be obvious to one of ordinary kill in the art to use the oil of Chen in the margarine of Decio in order to prepare a butter that does not have a typical olive oil bitter type flavor. Although the polyphenol content of the oil is not expeciall mentioned in the Chen and Decio reference, Lai Ganguli teaches that it is a known component of olive oil.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Decio in view of Chen and further in view of Lai Ganguli as applied to claims 1-3 above, and further in view of Baileys.

The claims appear to differ from Decio in view of Chen and further in view of Lai Ganguli in the recitation of the presence of squalene in the oil. Baileys teaches at pages 256 to 257 that squalene is a natural constituent of olive oil. Thus one would expect that the spread of Decio that contains olive oil to inherently also contain squalene. Further one would not expect the squalene content of olive oil to be reduced by the treatment process of Lai Ganguli because squalene is a hydrocarbon, soluble in oil, which would not be expected to be extracted by the water of Lai Ganguli.
